PROFESSIONAL SUMMARY

Results-driven Software Engineer with nearly 4 years of experience designing and delivering scalable e-commerce and web applications. Specializes in Magento 2 platform development and full-stack PHP and Laravel development, with a proven track record of optimizing platform performance, streamlining CI/CD pipelines, and implementing complex business logic across B2B and B2C environments. Currently builds payment, search and seller-campaign features for a Saudi multi-vendor marketplace, and recently led a school's full digital transformation solo.

SKILLS

- **Backend Development:** PHP, Java, Magento 2, Adobe Commerce, Laravel, Node.js, AJAX, Composer, PHPUnit, Pest
- **Frontend Development:** HTML5, CSS3, JavaScript, React.js, Alpine.js, KnockoutJS, Bootstrap, Tailwind CSS, HTMX, Livewire
- **Magento Themes and CMS**: Hyvä, Luma, PWA/Headless, PageBuilder, Indexers & Cron, Adobe Commerce Cloud
- **API Development:** RESTful APIs, GraphQL, Payment Gateways (Tabby, Payfort), Aramex, Odoo ERP, Klaviyo
- **Database:** MySQL, MariaDB, Redis, Elasticsearch, OpenSearch, Algolia, Schema Design, Query Optimization
- **DevOps and Cloud:** Docker, AWS (S3, Lightsail), GCP, Cloudflare Tunnel, Nginx, Apache, Varnish, RabbitMQ, Linux, CI/CD
- **Version Control & Tools:** GitHub, Git, Bitbucket, Jira, Trello, Postman, Artillery (load testing)
- **AI & Ways of Working:** AI-assisted development with Claude, Claude Code, and Claude API, Agile/Scrum, Cross-Functional Collaboration, Problem-Solving, Effective Communication

PROFESSIONAL EXPERIENCE

Business Applications Manager / E-commerce Developer | Alyaum Consulting Services, Cairo, Egypt **Sep 2026 - Present**

- Develop Voucherek, a Saudi multi-vendor marketplace, in close collaboration with the V4Tech team, delivering custom Magento 2 modules integrated with Node.js and React, built with plugins and no vendor code changes.
- Payments: upgraded Tabby BNPL to its v2 API with idempotent captures and built fail-safe RSA-2048 order-ID encryption. Traced failed payments in Klaviyo and shipped a Payment Failed event sender (311 automated checks).
- Seller campaigns: designed a scheduled price engine that applies and restores campaign prices automatically, with price locks across every write path and joint pricing for overlapping campaigns.
- Search & feeds: built Arabic/English cross-language Algolia search and an OpenAI product feed (~8,800 products in ~2 min).
- Checkout & integrations: delivered artwork uploads with an S3 tag-based lifecycle, an optional paid-service fee with refund rules, an Aramex tracking API and Odoo ERP sync extensions.

Full-Stack Software Engineer (Freelance) | St. John American School, Cairo, Egypt **Jun 2026 - Sep 2026**

- Led St. John American School's digital transformation solo, from requirements gathering with leadership, finance and teaching staff to on-site installation, replacing scattered Access files with one Laravel 13 and MySQL platform.
- Migrated legacy Access and Excel records into a structured database (60+ data models) and delivered 4 portals (public website, staff, parents, students) with 10 permission-based roles and full English/Arabic (RTL) support.
- Built US-style academics (marks approval, GPA, report cards, transcripts), timetabling with teacher availability, covers and substitutions, plus attendance, library, buses and a shared inbox.
- Implemented fees, installments, receipts and arrears tracking with automated reminders via WhatsApp, email and the portal, synced live for parents.
- Designed an offline-first architecture running 100% on the local network, exposing only the public site and portals through Cloudflare Tunnel with no open ports, static IP or hosting costs.
- Hardened security with Cloudflare rules blocking the admin dashboard externally, trusted-proxy configuration and 2FA for admin and finance accounts, backed by 760+ automated tests (PHPUnit and Pest).

Magento Developer | GILA Al Tawakol Electric, New Cairo, Egypt **Dec 2025 - Apr 2026**

- Developed a custom Magento module to implement free shipping on first orders after Ramadan Iftar.
- Monitored production servers on GCP as DevOps, swiftly diagnosing and resolving issues.
- Handled development environments on AWS Lightsail for seamless deployments.
- Planned and compared architecture options (headless Magento Open Source, Hyvä, traditional, Adobe Commerce) to recommend the best fit for business requirements.

Software Engineer | Scandiweb, Riga, Latvia (Remote) **Aug 2024 - Sep 2025**

- Developed and implemented full-stack (frontend and backend) solutions in Magento 2, across various features and modules for both Hyvä and Luma themes.
- Contributed to the planning and timely delivery of e-commerce projects, maintaining high-quality standards.
- Collaborated with cross-functional teams to enhance CI/CD pipelines using Docker, resulting in more efficient deployments.
- Refactored and optimized modules, reducing response times and building advanced cost calculation logic in the cart and checkout to increase platform efficiency.

Key Projects

Murergrej – B2C & B2B Building Materials Platform

- Streamlined product management by introducing multi-EAN functionality for tiered pricing, enhancing inventory handling and flexibility.
- Enhanced cart and checkout processes, incorporating advanced pallet cost calculations and facilitating seamless integration with third-party WMS.
- Improved platform performance by refactoring product API endpoints and addressing critical issues with third-party Magento extensions.

Decks Direct – E-commerce Solutions for Deck Building Brands

- Implemented Hyvä theme customization for calculators, ensuring seamless integration with business logic while enhancing the user interface.
- Enhanced content management by tailoring PageBuilder for reusable CMS components and performed performance optimization on Adobe Commerce Cloud through stress testing with Artillery.

Christmas Tree World – E-commerce Platform

- Implemented Imgix CDN integration with the Amasty Visual Merchandiser backend to enhance image delivery performance, significantly improving load times for product thumbnails.
- Optimized the Cart2Quote admin interface by integrating Imgix-powered product visuals and implementing lazy loading for thumbnails, reducing page load time and improving user experience.
- Developed Magento 2 customizations with a focus on upgrade resilience, utilizing template overrides, dependency injection (DI) plugins, and renderer replacements to ensure seamless future updates and compatibility.

Backend Developer | Holol, Giza, Egypt **Apr 2024 - Jun 2024**

- Engineered and maintained backend systems for real estate project management and product categorization platforms using PHP and Laravel, ensuring scalability and high performance.
- Designed and implemented dynamic content loading with HTMX and Livewire, enhancing user interactivity and enabling real-time updates.
- Optimized database queries and backend processes to ensure fast response times, while collaborating with cross-functional teams to seamlessly integrate frontend components powered by Bootstrap.

Key Projects

Real Estate Project Management Dashboard

- Developed a comprehensive management system for real estate projects, enabling efficient project categorization and dynamic content loading for improved user experience and real-time updates.

Full-Stack Laravel Developer | Alliance Visions, Saudi Arabia (Remote) **Jun 2023 - Apr 2024**

- Built and maintained full-stack e-commerce and organizational platforms with PHP and Laravel, covering inventory, orders, product catalogs, authentication and search, with responsive AJAX and Bootstrap front-ends optimized for performance.

Key Projects

Zumurud – E-commerce System

- Optimized an e-commerce platform with comprehensive functionalities, including inventory and order management, shopping cart, product catalog, user authentication and security, and a seamless search feature with an intuitive user interface.

Backend Developer (Freelance) | Damas Beauty Salon, Al Ain, UAE **Dec 2023 - Jan 2024**

- Designed and built Damas, a beauty salon management system for a salon in Al Ain, UAE, using PHP and Laravel.
- Delivered client management, an employee dashboard and financial reporting to run daily salon operations (damassalon.com).

Software Engineer Intern | Fresh Electric, El Obour, Qalyubia, Egypt **Dec 2022 - Apr 2023**

- Built a Magento 2 FAQ module that lets admins add, edit and delete questions and answers, with priority-based ordering.

Mandatory Military Service | Egypt **Oct 2021 - Dec 2022**

EDUCATION

Bachelor of Information Systems | Faculty of Computers and Artificial Intelligence, Helwan University
Grade: Very Good & GPA: 2.84/4.0 **Sep 2017 - Jun 2021**

Graduation Project: Travely – Mobile Application

- Project Overview: Travely is a mobile application designed to connect travelers and regular users with travel agencies, streamlining the communication process and reducing the effort spent by both parties.
- Role: Collaborated with a team of developers to build the front-end in Flutter and Dart, backed by Cloud Firestore and Google Cloud Functions.
- Key Achievements: The project was awarded an "A+" grade for its execution and performance.

LANGUAGES

- Arabic: Native
- English: Advanced (Professional Working Proficiency)
