

Abanoub Youssef Maher Ghaly

Software Engineer | Magento Developer

Cairo, Egypt | +201090926987 | abanoubyossef28@gmail.com | [LinkedIn](#) | [Github](#)

Results-driven Software Engineer specializing in e-commerce and data management systems development, with extensive experience building scalable, high-performance e-commerce platforms using Magento 2 and PHP. Skilled in backend and frontend development, custom module creation, and complex business logic implementation. Well-versed in developing robust backend services. Experienced with Docker, CI/CD pipelines, Nginx, Apache, AWS, GCP, terminal operations, and version control using Git. Strong understanding of software architecture, performance optimization, and security standards. Collaborative team player experienced in Agile environments, focused on delivering solutions that enhance user experience and drive business growth

SKILLS

- **Backend:** PHP, Magento 2, Laravel
- **Frontend:** HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, Alpine.js, React.js, KnockoutJS, HYVÄ Theme, LUMA Theme
- **API Development:** RESTful APIs, GraphQL, API Integration
- **Database:** MySQL, MariaDB, Database management
- **DevOps & Containerization:** Docker, AWS, GCP, Linux (Ubuntu), Nginx, Apache, Artillery tool
- **Version Control:** GitHub, Git, Bitbucket
- **Other Skills:** Object-Oriented Programming (OOP), Agile Methodologies, Collaboration & Teamwork, Adaptability & Flexibility, Effective Communication, Time Management

PROFESSIONAL EXPERIENCE

Magento Developer | Gila Al-Tawakol electric, New Cairo, Egypt

Dec 2025 - April 2026

- Developed a custom Magento module to implement free shipping for first order post- Ramadan Iftar
- Monitored production servers on GCP as DevOps, swiftly diagnosing and resolving issues
- Handled development environments on AWS Lightsail for seamless deployments.
- Planned and compared architecture options (headless Magento Open Source, Hyvä, traditional, Adobe Commerce) to recommend the best fit for business requirements.

Software Engineer | Scandiweb, Riga, Latvia

Aug 2024 - Sep 2025

- Developed and implemented full-stack (frontend and backend) solutions in Magento 2, across various features and modules for both HYVÄ and LUMA themes.
- Contributed to the planning and timely delivery of e-commerce projects, maintaining high-quality standards.
- Collaborated with cross-functional teams to enhance CI/CD pipelines using Docker, resulting in more efficient deployments.
- Refactored and optimized modules, reducing response times and building advanced cost calculation logic in the cart and checkout to increase platform efficiency.

Key Projects

Murergrej – B2C & B2B Building Materials Platform

- Streamlined product management by introducing multi-EAN functionality for tiered pricing, enhancing inventory handling and flexibility.
- Enhanced cart and checkout processes, incorporating advanced pallet cost calculations and facilitating seamless integration with third-party WMS.
- Ensured adherence to security standards by integrating comprehensive cookie management aligned with CSP compliance guidelines.
- Improved platform performance by refactoring product API endpoints and addressing critical issues with third-party Magento extensions.
- Drove cross-functional collaboration to troubleshoot and resolve integration challenges, ensuring efficient and timely project delivery.

Decks Direct – E-commerce Solutions for Deck Building Brands

- Implemented HYVÄ theme customization for calculators, ensuring seamless integration with business logic while enhancing the user interface.
- Enhanced content management by tailoring PageBuilder for reusable CMS components and performed performance optimization on Adobe Commerce Cloud through stress testing with Artillery.

Christmas Tree World – E-commerce Platform

- Implemented Imgix CDN integration with the Amasty Visual Merchandiser backend to enhance image delivery performance, significantly improving load times for product thumbnails.
- Optimized the Cart2Quote admin interface by integrating Imgix-powered product visuals and implementing lazy loading for thumbnails, reducing page load time and improving user experience.
- Developed Magento 2 customizations with a focus on upgrade resilience, utilizing template overrides, dependency injection (DI) plugins, and renderer replacements to ensure seamless future updates and compatibility.

Technologies Used: Magento 2, Adobe Commerce Cloud, Docker, HYVÄ Theme, CMS, PageBuilder, KnockoutJS, LUMATheme, REST APIs, Artillery Tool

Backend Developer | Holol, Giza, Egypt **Apr 2024 – Jun 2024**

- Engineered and maintained backend systems for real estate project management and product categorization platforms using PHP and Laravel, ensuring scalability and high performance.
- Designed and implemented dynamic content loading with HTMX and Livewire, enhancing user interactivity and enabling real-time updates.
- Optimized database queries and backend processes to ensure fast response times, while collaborating with cross-functional teams to seamlessly integrate frontend components powered by Bootstrap.

Key Projects

Real Estate Project Management Dashboard

- Developed a comprehensive management system for real estate projects, enabling efficient project categorization and dynamic content loading for improved user experience and real-time updates.

Mama-Sauce Dashboard

- Implemented a streamlined product management system, optimizing the management of products and categories for enhanced operational efficiency.

Technologies Used: PHP, Laravel, JS, HTMX, Livewire, Bootstrap

Full Stack PHP Laravel Developer | Visions LLC, Jeddah, Saudi Arabia **Jun 2023 – Apr 2024**

- Created and maintained full-stack solutions for e-commerce and organizational platforms, implementing core features such as inventory management, order processing, product catalogs, user authentication, and search functionality using PHP and Laravel.
- Designed and integrated responsive front-end components with AJAX and Bootstrap, ensuring a seamless and user-friendly interface while optimizing back-end processes for performance and scalability.

Key Projects

Zumurud – E-commerce System

- Optimized an e-commerce platform with comprehensive functionalities, including inventory and order management, shopping cart, product catalog, user authentication and security, and a seamless search feature with an intuitive user interface.

Tarmem Organization

- Contributed to sustainable development initiatives through empowering communities, facilitating collaborative efforts, and enhancing capacity building for long-term impact.

Backend Developer | Freelance, Al Ain, UAE **Dec 2023 - Jan 2024**

- Delivered backend development solutions for various clients, including designing and implementing tailored systems such as the Damas Beauty Salon Management System, ensuring high-quality, scalable, and efficient solutions.

Key Projects

Damas- Beauty Salon Management System

- Executed a management system for beauty salons with features including client management, employee dashboard, and financial reporting.

Technologies Used: PHP, Laravel, JavaScript, AJAX, Bootstrap

- ### Technologies Used: PHP, Magento 2

Graduation Project: Travely – Mobile Application

Sep 2020 - May 2021

- **Project Overview:** Travely is a mobile application designed to connect travelers and regular users with travel agencies, streamlining the communication process and reducing the effort spent by both parties.
- **Role:** Collaborated with a team of developers to design and develop the front-end using Flutter and Dart.
- **Technologies Used:** (Front-end: Flutter, Dart - Backend: Cloud Firestore, Google Cloud Functions, Internal API)
- **Key Achievements:** The project was awarded an "A+" grade for its execution and performance.

EDUCATION

- **Bachelor of Computer Science | Faculty of Computers and Artificial Intelligence, Helwan University | Grade: Very Good | GPA: 2.83/4.0 | Sep 2017 - May 2021**

LANGUAGE

- Arabic:** Native **English:** Advanced
